F.C.T Nigeria.

## Relevant Experience

### Backend engineer, Baobab Nigeria

July 2024 - Present

- Build and maintain critical components used to construct Baobab's backend, across the whole product.
- Design, build, and maintain the server-side logic, databases, and APIs that power web and mobile applications.
- Work closely with cross-functional teams, including developers, designers, and product managers, to ensure that the systems are efficient, scalable, and secure.

### Trainer, Bizmarrow technologies

Sept 2023 - June 2024

- Facilitated hands-on coding sessions, labs, and workshops to reinforce learning.
- Guided students through individual and group projects, helping them apply their skills to build real-world applications.
- Continuously learnt and stayed updated on new programming languages, tools, and technologies to keep the curriculum relevant.

### Software developer intern, Gomycode

July 2021 - Dec 2021

- Assisted in the development of new software features, modules, or applications.
- Helped to build and maintain APIs, databases, or backend systems.
- Gained exposure to real-world challenges and build a foundation for a future career in tech.

## Educational Background

### Bachelor of Science (BSc.), Computer Science

University of Nigeria Nsukka

2018 - 2022

### Fullstack software internship

Gomycode

2021

## Skills

### Programming Languages

- Javascript
- Python
- Typescript
- HTML/CSS

### Libraries & Frameworks

- Node.js
- Express.js, Nest.js
- React.js, Next.js
- Tailwind css
- Django
- MySQL, Postgress, MongoDB

### Tools & Platforms

- Git, Github
- AWS
- Docker, Kubernetes
- Redis
- Jenkins
- Jest

## Interests

- Financial systems
- Artificial Intelligence
- Mental well-being
- Science fiction
- Hiking, swimming
- Cooking
